### WHAT IS A BIOBLITZ?

A BioBlitz is an event that focuses on finding and identifying as many species as possible in a specific area over a short period of time.

### WHO CAN PARTICIPATE?

Individuals, families, students, teachers, divers, snorkelers, beach goers, rock poolers, scientists - anyone can contribute. Together we can form a snapshot of an area's biodiversity.

### WHAT YOU NEED TO DO

1. Download the iNaturalist app on your phone or register on the iNaturalist website.
2. Head to one of South Africa's 20 coastal MPAs between 29 - 31 July 2022.
3. Take photos of any plants and animals you see using your phone or camera.
4. Upload these images to the app or the iNaturalist website when you're done - remember to mark the location of your observations to be included in the BioBlitz!
